

ABDULMALIK USMAN

Kwara State, Nigeria

(+234) 7065352944 usmanabdulmalik65@gmail.com

PROFESSIONAL SUMMARY

Dedicated and results-driven Civil Engineering graduate from Federal University of Technology, Minna, with hands-on experience in infrastructure development, project management, and community-focused initiatives. Graduate member of NSE and IAENG. Seeking an entry-level or graduate engineering role where I can apply technical skills, leadership abilities, and passion for sustainable development to deliver innovative engineering solutions.

CORE SKILLS

Technical: Civil Engineering Design, Project Management, Structural Analysis, Quality Control, Cost Estimation, Quantity Take-offs, Soil Testing, Environmental Compliance

Software: AutoCAD, Microsoft Excel, Microsoft Office, Microsoft PowerPoint, Zoom, Skype

Soft Skills: Problem-Solving, Leadership, Team Collaboration, Communication, Attention to Detail, Time Management

WORK EXPERIENCE

Civil Engineering Graduate Trainee

Jan 2021 – Dec 2022

Ministry of Rural Development and Community Affairs, Oshogbo, Nigeria

- Led and participated in the planning, design, and execution of 5+ infrastructure projects (roads, water supply, sanitation) benefiting over 10,000 rural residents.
- Managed project budgets totaling ₦50M+, ensuring timely and cost-effective completion within 5% of budget.
- Collaborated with government officials and community leaders to prioritize projects, resulting in 100% stakeholder approval.
- Ensured 100% compliance with building codes and regulatory standards across all projects.
- Provided technical training to 30+ local contractors and community members, empowering them to maintain project infrastructure.
- Developed monitoring frameworks that improved project performance tracking by 25%.

Bua Lasuco, Lafiagi, Nigeria

- Conducted routine structural inspections on 20+ company buildings, identifying and flagging 5 potential safety issues for immediate action.
- Assisted in quantity take-offs and cost estimations, helping maintain project budgets with 10% cost savings.
- Participated in soil testing and analysis for 8 construction sites, providing critical input for foundation design.
- Maintained project documentation (progress reports, meeting minutes, correspondence) with 100% accuracy.
- Participated in safety meetings and inspections, identifying 15+ potential hazards and recommending corrective measures.

EDUCATION

Bachelor of Engineering (B.Eng.) in Civil Engineering	2021
Federal University of Technology, Minna	

PUBLICATIONS

Impact of Tricycle Operation on Urban Mobility	2022
