Education

Federal Polytechnic Ilaro- Ogun State
HND- Mechanical Engineering - 2018
ND- Mechanical Engineering - 2015

Core Competencies

- Heavy Rotating Equipment
- Good communication skills
- Good interpersonal relationship
- Diagnostics & Alignment
- Structural Steel Fabrication & Erection
- Industrial Piping & Hydrostatic Testing
- Preventive & Predictive Maintenance (PM/PdM)
- Root Cause Analysis (RCA) & Failure Mode and Effects Analysis (FMEA)
- Computer-Aided Design (AutoCAD)
- Technical Drawing Interpretation (P&ID & Isometrics)
- Bill of Quantities (BOQ) & Material Take-Off (MTO) Estimation
- Lock-Out/Tag-Out (LOTO) & Industrial HSE Protocols

References

Available on Request.

Professional Profile

A Mechanical Engineer with over 5 years of progressive experience in industrial plant maintenance, heavy machinery operations, and structural mechanical construction. Experienced at optimizing asset reliability and project delivery across prestigious organizations including LafargeHolcim Cement Plc and Sevan Construction Company. Experienced in rotating equipment, preventive and corrective maintenance frameworks, structural steel fabrication, and piping installations. Worked with cross-functional technical teams, executing root cause analysis (RCA) to minimize downtime, and ensuring strict adherence to global health, safety, and environmental (HSE) standards.

Professional Experience

ABRAHAM ENTERPRISES- 2020- Till Date

- Managed an independent fashion retail business, overseeing end-to-end operations, brand positioning, and financial planning during a career break.
- Managed end-to-end supply chain activities, including sourcing high-quality apparel from global and local vendors, negotiating pricing, and coordinating shipping logistics.
- Utilized inventory management tools to track stock levels, analyze purchasing patterns, and optimize product selection to minimize overhead costs and reduce unsold inventory.
- Handled daily financial administration, including cash flow analysis, budget forecasting, pricing strategies, and profit margin optimization, ensuring sustained business growth.

SEVAN CONSTRUCTION NIGERIA LIMITED| IFO OGUN STATE | 2016-2017

- Assisted senior engineers in supervising the on-site fabrication, assembly, and erection of structural steel members for Pre-Engineered Buildings (PEBs).
- Consistent cleaning, lubrication, and inspection of machinery to ensure optimal precision and prevent downtime.
- Ability to measure precisely the bending and cutting of metals.
- Interpreted isometric drawings, structural designs, and Piping and Instrumentation Diagrams (P&IDs) to assist fabrication crews with layout accuracy.
- Participated in daily safety walkthroughs, ensuring strict on-site compliance with Job Safety Analysis (JSA) and Lock-Out/Tag-Out (LOTO) guidelines.
- Maintained daily project logs and material delivery records, coordinating with warehouse teams to verify the specifications of arriving mechanical assets.

LAFARGEHOLCIM CEMENT PLC | Ogun State | 2010 - 2014

- Monitored, operated, and optimized high-precision machinery and mechanical systems, executing diagnostic checks to maintain continuous production cycles.
- Managed the systematic sorting, labeling, and packaging of manufactured components, conducting rigorous quality inspections to verify adherence to client and ISO standards.
- Ability to operate a conveyor belt machine and adhering to conveyor belt safety rules and regulations
- Ensure strict compliance with health and safety procedures, utilizing Lock-Out/Tag-Out (LOTO) protocols and actively contributing to hazard identification and risk mitigation.
- Assisted in the precision leveling, alignment, and positioning of light rotating equipment and pumps under the supervision of senior site specialists.
