PROFILE

Results-driven Ethical Hacker and Penetration Tester with over four years of experience in offensive security, cybersecurity research, and information system security. Skilled in vulnerability assessments, malware analysis, digital forensics, reverse engineering, incident response, and adversary emulation within authorized environments.

Proficient with Burp Suite, Nmap, Masscan, Amass, Metasploit Framework, Wireshark, Ghidra, Radare2, Aircrack-ng, Wifite, Recon-ng, Maltego, SpiderFoot, Frida, ADB, Splunk Enterprise, ELK Stack, and Wazuh. Actively engaged in Hack The Box, Capture-the-Flag (CTF) competitions, penetration testing labs, and bug bounty programs, applying the MITRE ATT&CK framework, Cyber Kill Chain, and OWASP Top 10 to identify and mitigate security risks. His interest focuses mainly in zero-day exploit development through stress testing and low-level programming.

Currently serving as a Cybersecurity Instructor, delivering hands-on training in penetration testing, malware analysis, digital forensics, networking, SIEM operations, and threat intelligence while leveraging strong analytical, research, and automation skills to strengthen organizational cyber resilience.

WORK EXPERIENCE

SKILLBOOST AFRICA

2025 - PRESENT

Cybersecurity Consultant

- Develop and execute comprehensive syllabi for techniques and strategies that align with the MITRE Att&ck and NIST Frameworks.
- Lead, mentor, and manage hands-on cybersecurity training for students, interns, and junior analysts in penetration testing, malware analysis, digital forensics, networking, SIEM operations, and threat intelligence, fostering a collaborative and practical learning environment.
- Monitor consistency and quality of cybersecurity training materials, technical documentation, laboratory exercises, and educational content across training programs to ensure standardized learning outcomes and alignment with industry best practices.

Defcomm

2024 - 2026

Bug Hunter

- Test defcomm public-facing system for critical and medium vulnerabilities
- Test in-house operating systems and application software for advanced decryption technologies.

PROJECTS

- Network sniffer
- Bug Hunting
- Wireless Hacking
- CSINT TOOL
- Log Monitor
- Log Index
- Obsfucator
- IMSI Catcher
- Satellite Tracking
- Malware Analyser
- GPS Tracker

RESEARCH

- Reconnaissance
- Offensive tools
- Exploit
- WAF Evasion

CERTIFICATION

CIP (OPSWAT)

CEH (CISCO)

EDUCATION

Certification of Completion

Cloud Security | Palo Alto

Grade: 95+

2026

Critical Infrastructure Protection

Infrastruture Security | OPSWAT

Grade: 95+

2026

Ethical Hacker

Network Academy | Cisco

GPA: 3.0 / 4.0

2019 - 2024

Certification of Completion

McKinsey Forward Program | McKinsey & Company

Finalist

2019 - 2024

Bachelor in Science

Mechanical Engineering | University of Ibadan

GPA: 3.0 / 4.0

2019 - 2024

Certification of Completion

Network Academy | Cisco

Grade: 90+

2020-2021

Diploma

Mechanical Engineering | Federal Polytenic Ede

GPA: 3.7 / 4.0

2014 - 2016
