OBJECTIVE

Results-driven Mechanical Engineering graduate with strong practical exposure in mechanical systems, internal combustion engines, production support, and project supervision. Demonstrated ability to collaborate with multidisciplinary teams, support engineering projects from concept to execution, and ensure compliance with safety and quality standards. Possesses hands-on experience in equipment inspection, production troubleshooting, and process optimization, complemented by leadership experience in operations management. Seeking a challenging mechanical or engineering role where technical competence, problem-solving skills, and continuous improvement mindset can contribute to operational excellence and organizational growth.

SKILLS

- Engineering Safety Awareness & Compliance
- Production Support & Operations Monitoring
- Leadership & Team Supervision
- Problem Solving Under Pressure
- Analytical Thinking & Decision Making

MECHANICAL & ENGINEERING SKILLS

- Mechanical Systems & Components Development
- Internal Combustion Engine (Truck & Tractor Trailer Systems)
- Production Line Control & Process Optimization
- Machine Design & Equipment Inspection
- Preventive & Corrective Maintenance
- Material Handling & Manufacturing Processes
- Quality Control & Safety Compliance
- Technical Documentation & Record Keeping

OPERATIONAL & PROFESSIONAL SKILLS

- Project Supervision & Execution Support
- Continuous Improvement & Risk Management
- Troubleshooting & Root Cause Analysis
- Team Collaboration & Cross-functional Support
- Written & Verbal Technical Communication
- Time Management & Task Prioritization
- Adaptability in Dynamic Work Environments

EXPERIENCE

2024 - 2025

- Institute of Continuing Education, Delta State – Asaba**
Project Supervisor (NYSC)
- Supported mechanical engineering projects by collaborating with technical teams to develop, test, and validate mechanical components and prototypes.
 - Conducted research on materials selection and manufacturing processes to support project feasibility and performance optimization.
 - Assisted senior engineers in project planning, scheduling, and execution, ensuring milestones were achieved within defined timelines.
 - Inspected equipment installations and repair works to ensure compliance with quality standards and operational specifications.
 - Provided hands-on technical support during production processes by identifying faults, recommending solutions, and minimizing downtime.
 - Maintained accurate technical records, reports, and documentation for ongoing and completed engineering projects.
 - Actively participated in safety meetings and inspections, contributing to compliance with workplace health, safety, and environmental standards.

2021 - 2023

- Beverly Hills Hotel, Ekpoma, Edo State**
Hotel Manager
- Oversaw daily hotel operations, ensuring optimal guest satisfaction, service quality, and operational efficiency across all departments.
 - Coordinated front desk, housekeeping, maintenance, and logistics functions to ensure smooth facility operations and timely issue resolution.
 - Managed budgeting, cost control, and basic financial reporting to improve profitability and reduce operational waste.
 - Supervised recruitment, onboarding, and training of staff, improving team performance and service delivery standards.
 - Implemented operational improvements that enhanced workflow efficiency and customer experience.
 - Handled facility maintenance coordination, ensuring equipment and utilities were functional and compliant with safety standards.

EDUCATION

- 2024 **Ambrose Alli University, Ekpoma, Edo State, Nigeria**
Bachelor of Engineering (B.Eng) – Mechanical Engineering
- 2025 **Truckademy**
Truck & Tractor Trailer Training (Internal Combustion Engine)
- 2015 **Assurance Secondary School, Ekpoma, Edo State**
Senior Secondary School Certificate (SSCE)
