

BUBA ADAMU

Cybersecurity Analyst • Ethical Hacker • IT Support Specialist

bubaadamu8585@gmail.com | 07033604113 | Durumi, Garki, Abuja | Adamawa State

PROFESSIONAL SUMMARY

Results-driven Cybersecurity professional with 8 years in IT support and 3+ years in ethical hacking & VAPT. Electrical/Electronic Engineering background (ND/HND), PGD in Cybersecurity and ongoing MSc in Cybersecurity & Digital Forensics. Proven in troubleshooting complex systems, firmware-level mobile repair, and identifying OWASP Top 10 vulnerabilities with Burp Suite, Nmap, Nessus. Seeking to leverage hands-on technician discipline and offensive security skills as a Cybersecurity Analyst / Ethical Hacker in a growth-focused team.

CORE SKILLS

Cybersecurity Skills

Ethical Hacking, VAPT, OWASP Top 10, Network Security, Burp Suite, Nmap, Nessus, Wireshark, Security Hardening, Remediation Reporting, TCP/IP, DNS, HTTP/S, DHCP

Technical Support Skills

Computer Troubleshooting (Hardware & Software), Mobile Software Troubleshooting & System Optimization, OS Installation (Windows/Linux), Firmware Flashing, Data Recovery, Networking Skills, Network Protocols, Hotspot Business Management, Customer Support

WORK EXPERIENCE

Self-Employed – Computer & Mobile Phone Software Technician

Durumi, Garki, Abuja | 2017 – Present

- Computer troubleshooting – both hardware and software diagnostics, repairs, and system optimization.
- Diagnosed and resolved 1000+ hardware/software issues including OS installation, boot failures, data recovery, and virus removal.
- Optimized system performance and implemented backup protocols, reducing repeat service requests by 30% through client education.
- Managing and operating a hotspot internet service business – network setup, user management, and bandwidth optimization.
- Managed end-to-end customer support, inventory, and service documentation while maintaining 4.8/5 satisfaction rate.

Ethical Hacker & Website Vulnerability Assessor (Self-Directed / PGD Project Work)

2022 – Present

- Skilled in Vulnerability Assessment and Penetration Testing (VAPT) methodology and OWASP Top 10 risks including SQL Injection, XSS, CSRF, IDOR, and Broken Authentication.
- Proficient in security tools: Burp Suite, Nmap, Nessus, and Wireshark for scanning, manual validation, and reducing false positives.
- Knowledgeable in delivering remediation reports with proof-of-concept, impact analysis, and hardening steps.
- Strong understanding of Networking and Network Protocols (TCP/IP, DNS, HTTP/S, DHCP) applied to security analysis.
- Experienced in basic web security hardening (security headers, input validation, patching).

EDUCATION

MSc Cybersecurity & Digital Forensics (In View) – Nasarawa State University, Keffi – 2026 — Ongoing

PGD in Cybersecurity – Federal University of Technology, Minna

PGD Project: Conducted vulnerability assessment including CSRF vulnerability discovery on Nigeria MDA (Ministries, Departments and Agencies) websites, with detailed proof-of-concept and responsible disclosure reporting.

ND & HND Electrical / Electronic Engineering – Federal Polytechnic Mubi, Adamawa State
