SUMMARY

Junior software developer with hands-on experience building REST APIs, web applications, and automation tools using Laravel, Node.js, and Vue. Strong focus on backend development, database optimization, and scalable system design. Seeking NYSC Software Engineering role to contribute to fintech and clean-energy-driven platforms.

SKILLS

PHP (Laravel), JavaScript (Node.js), Vue.js, React, REST APIs, MySQL, PostgreSQL, Git, Docker, Linux, API Integration, Authentication

WORK EXPERIENCE

International Center for Environmental Health Jul 2025 - Sept 2025
Software Engineer (Contract)

- Built a role-based CMS used by 50+ staff to manage operational content.
- Improved workflow efficiency by 80% through process automation features.
- Reduced data redundancy by designing normalized database schemas.

Christopher University, Mowe Jan 2025 - Jul 2025
Software Engineer Intern

- Assisted in developing and maintaining 3 web applications with 95% uptime.
- Resolved 50+ technical issues across software and system infrastructure.
- Supported deployment, testing, and debugging of academic software tools.

PROJECTS

Social Media Analytics Platform

- Aggregated data from 5+ social platforms using API integrations.
- Built dashboards visualizing 1k+ daily data points for performance tracking.

Calendar Booking System (Laravel + Vue)

- Developed real-time slot booking system preventing double bookings.
- Integrated Google Calendar sync and automated event creation.

AI Automation Scripts

- Automated lead data collection and messaging workflows, saving ~70% manual effort.

EDUCATION

Olabisi Onabanjo University Sept 2019 - Sept 2024
B.Eng Mechanical Engineering

CERTIFICATIONS

Certified in Cybersecurity (CC)

HSE Levels 1–3
