WORK EXPERIENCE

Computer Hardware Repair and Maintenance Personnel

Pear SDC 2020-2022

- I was responsible for creating content for the department's YouTube channel and social media management
- Here I also worked as the assistant to my HOD for the hardware department and handled most of the jobs from our clients in his stead
- Not only did I attend to technical issues with our clients I was also responsible for ensuring all computer devices are working perfectly fine within the office premises
- In most cases, I branch out and not only fix computer technical issues but also other devices like phones, Printers, Scanners, etc.

TRAINING INSTRUCTOR

M-R International 2023- 2024

- As an Instructor at M-R International i handle multiple classes such as the; Computer Hardware Class, Graphics Design Class, UI/UX Production Class, Microsoft Office Class for Beginners
- I was responsible for designing of flyers and promotional shorts for upcoming events
- Outside being an instructor I'm also the Hardware engineer in the company. I am responsible for ensuring all computer devices laptop, desktop or printer are all in good condition.
- I have also handled Ethical Hacking with kali linux Classes at the company and I also helped in social media account management

TRAINING INSTRUCTOR/IT REPAIR CONSULTANT

Loctech 2024- 2025

- As an Instructor at Loctech i handle multiple classes such as the; Computer Hardware Class, Graphics Design Class, UI/UX Production Class, Microsoft Office Class for Beginners
- I was responsible for designing of flyers and promotional shorts for upcoming events
- Outside being an instructor I'm also the Hardware engineer in the company. I am responsible for ensuring all computer devices laptop, desktop or printer are all in good condition.
- I have also handled Ethical Hacking with kali linux Classes at the company and I also helped in social media account management

WORK EXPERIENCE

PRODUCT DESIGNER (PART-TIME, REMOTE)

SM comics 2025 - 2026

- Designed end-to-end user experiences for the SM Comics mobile and web applications, enhancing discoverability, reading flow, and user retention.
- Conducted user research, wireframing, prototyping, and usability testing to create intuitive and engaging interfaces for comic readers.
- Collaborated closely with developers, illustrators, and product managers to deliver features that balanced user needs with business goals.
- Contributed to the design system to ensure visual consistency across platforms and improve design efficiency
- Helped grow the app's user engagement metrics by improving navigation, onboarding, and in-app purchase flows.

CYBERSECURITY FACULTY

APTECH 2025 - 2026

- As a Faculty at Aptech i handle multiple classes such as the; CompTIA A+, UI/UX Production Class, Microsoft Office Class for Beginners
- Outside being an instructor I'm also the Hardware/Network engineer in the company. I am responsible for ensuring all computer devices laptop, desktop or printers, The exam Server, WiFi (Internet) are all in good condition.
- I also handle Ethical Hacking Course at AptechPH

Computer Hardware Repair and Maintenance And Networking Personnel

Tekmacho LTD 2026 - Current

- Responsible for keeping the company's computers, network and internet connection running reliably, through daily system checks and quick response to technical faults reported by staff.
- Provide first-line technical support to staff across the company, diagnosing and resolving hardware, software and connectivity problems and keeping staff working with minimal downtime.
- Monitor the health of company systems and equipment, and check the internet connection daily so that problems are caught early.
- Protect company data by backing up the company telephone system every week.
- Administer systems and the network, and work with the CTO on access, permissions and escalated technical issues.
- Carried out website penetration testing, identifying security weaknesses and supporting the protection of company web assets.
- Delivered UI/UX design and web design projects beyond my core duties, creating user-focused interfaces and websites for company use.
- Developed applications and internal tools that improve staff efficiency and accountability, taking on development work outside my formal job description.
- Skills: technical troubleshooting, computer and network support, system administration, data backup, web security testing, UI/UX and web design, application development, and clear communication with non-technical staff.
