Lagos,Nigeria

SUMMARY

Detail-oriented Human Anatomy graduate with a strong foundation in analyzing complex biological and technological systems. Proven ability to synthesize dense scientific data—demonstrated through extensive microanatomy research—alongside hands-on expertise in hardware optimization, software troubleshooting, and firmware configuration. An entrepreneurial self-starter who successfully conceptualized and launched an independent apparel brand, managing comprehensive market research and strategic operations. Brings a meticulous, diagnostic approach to problem-solving and is highly adaptable in dynamic, cross-functional environments.

EXPERIENCE

Lead Researcher

- Final-Year Micro Seminar 03/2026 - 05/2026 Ileshan-Remo, Ogun State
- Conducted comprehensive independent research and data synthesis on the effect of oxidative stress on the cerebellum, culminating in a highly structured academic presentation.
 - Delivered technical anatomical findings to a panel of departmental faculty and academic judges, demonstrating strong public speaking and scientific communication skills.
 - Exhibited strict professional conduct and composure under pressure, receiving highly positive evaluations for clarity, language, and presentation execution.

Founder & Operational Lead

- Luminary Labels 01/2025 - Present Lagos, Nigeria
- Spearheaded the conceptualization, launch, and daily operations of an independent apparel brand, driving brand visibility through targeted marketing across university and regional demographics.
 - Engineered a streamlined local logistics and fulfillment pipeline, ensuring rapid and reliable product delivery to cultivate a loyal customer base.
 - Managed end-to-end client relations, successfully translating localized market demands into sustained sales and high customer satisfaction.

Technical Specialist

- Freelance/Project-Based 04/2026 - Present Lagos, Nigeria
- Executed advanced system configurations, including successful manual firmware flashing and region software transitions (e.g., XAA service designations) on Samsung Galaxy systems.
 - Optimized cross-device functionality by calibrating and synchronizing display architecture between high-performance mobile devices and laptop workstations (e.g., HP Victus).
 - Diagnosed and resolved complex software extraction errors, actively managing system resource allocation to successfully verify and deploy large-scale software applications.

EDUCATION

Bachelor of Science (B.Sc.) in Human Anatomy

- Babcock University 09/2021 - 07/2026 Ileshan-Remo, Ogun state

INTERESTS

Healthcare Technology Integration & Clinical Operations

I am drawn to forward-thinking organizations that bridge clinical research and technical system optimization.

Business Operations & Technical Project Management

I am looking for cross-functional teams that value an entrepreneurial mindset and proactive problem-solving. I am attracted to companies that offer opportunities to leverage my experience in strategic planning, and system configurations to drive tangible business growth.

SKILLS

- Scientific & Analytic Skills:
- Scientific Communication & Presentation
- Biological Systems Analysis
- Research & Diagnostic Problem Solving
- Complex Data Synthesis
- Hardware & OS Optimization:
- Firmware Flashing
- System Configuration
- Software Trouble Shooting
- Cross-Device Synchronization
- Business & Operations Skills:
- Market Research & Localized Marketing
- Brand Conceptualization & Development
- Logistics & Fulfillment Operations
