## PROFESSIONAL SUMMARY

Electrical and Electronics Engineering graduate with hands-on experience in engineering operations, fault diagnostics, control systems, circuit design, and process improvement. Experienced in supporting automobile diagnostics and managing day-to-day operational activities in a fast-paced environment. Skilled in C programming, simulation tools, and basic AWS cloud computing concepts. Seeking a graduate trainee or entry-level engineering role to apply technical knowledge, analytical thinking, and problem-solving abilities.

## TECHNICAL SKILLS

- Fault Analysis and Diagnostics
- Circuit Design and Analysis
- Control Systems
- Simulation Tools
- C Programming
- Cloud Computing (AWS Fundamentals)
- Troubleshooting and Problem Solving
- Inventory and Operations Management

## WORK EXPERIENCE

**Operations Manager** | Ionia Global Resources, Ota | 2024 – Present

- Oversee daily administrative and operational activities to ensure smooth business operations.
- Manage resources efficiently to improve productivity, maintain quality control, and minimize waste.
- Monitor inventory levels and coordinate stock management processes.
- Track machinery status and support operational maintenance planning.

**Engineering Intern** | Smart Edge Technologies, Abuja | 2021 – 2022

- Conducted diagnostic tests on automobiles and reported findings to technicians.
- Supported repair follow-up procedures and post-repair testing activities.
- Maintained accurate service and repair logs to support vehicle history tracking.
- Assisted with troubleshooting and technical support tasks.

## EDUCATION

**Federal University of Petroleum Resources (FUPRE)** | 2017 – 2024

B.Eng. in Electrical and Electronics Engineering (Second Class Upper)
