Professional Summary

- Maintenance and factory operations professional with over 5 years of practical experience in preventive and corrective maintenance, production equipment inspection, troubleshooting, maintenance planning and operational support. Experienced in coordinating maintenance activities for production machinery, generators and facility systems, with hands-on exposure to identifying equipment faults, coordinating repairs, managing spare parts and minimizing operational disruptions.

Experienced in coordinating technicians, maintenance personnel and contractors; maintaining maintenance records; monitoring equipment condition; and implementing proactive maintenance measures to improve equipment reliability, operational continuity and workplace safety.

Holds an HND in Civil Engineering and a Professional Diploma in Health, Safety & Environment, with a practical approach to equipment maintenance, problem-solving, contractor coordination and factory operations.

Core Competencies

- Facility & Operational Management
- Preventive & Corrective Maintenance
- Facilities & Building Services Maintenance
- Maintenance Planning and Scheduling
- Equipment Inspection & Troubleshooting
- Vendor & Service Provider Management
- Spare Parts & Maintenance Inventory Control
- Asset Register and Maintenance Records
- HSE Compliance & Workplace Safety

Professional Experience

- **FINBUG NIGERIA LIMITED** January 2021 - Till present
Facility & Factory Operations Manager
 - Inspected production equipment and investigated equipment faults, deterioration and recurring maintenance issues, coordinating corrective actions before failures affected production.
 - Coordinate day-to-day factory and production operations, ensuring efficient use of manpower, equipment and production resources.
 - Conducted routine inspections of production equipment and facility systems to identify faults, deterioration and maintenance requirements before major breakdowns.
 - Coordinated maintenance of electrical installations, plumbing systems, HVAC and other facility services to support operational continuity.
 - Coordinated technicians and external maintenance contractors during equipment breakdowns, repairs, servicing and maintenance activities.
 - Monitored spare parts and maintenance materials, identified replacement requirements and supported procurement based on equipment and operational needs.
 - Ensure compliance with applicable HSE requirements and established workplace safety procedures within factory operations.
 - Maintain coordination between production, maintenance, procurement and management functions to minimize operational disruption.

Education

- **Environment and Safety Management Institute** 2020
Professional Diploma – Health, Safety and Environment (HSE 123)
Distinction

Technical Skills

- Maintenance Reporting & Documentation
- Preventive Maintenance Records
- Equipment Inspection
- Asset Register Management
- HSE documentation
- Maintenance Scheduling

Professional Strength

- Preventive maintenance mindset
- Attention to equipment condition and reliability
- Safety-conscious decision making
- Problem Identification and practical resolution
- Maintenance documentation and reporting
