PROJECTS

Bacterial Load Found in Salad Vegetables

- Conducted a microbiological study to evaluate bacterial contamination in commonly consumed salad vegetables.
- Applied standard laboratory techniques, including sample preparation, serial dilution, microbial culturing, Gram staining, and biochemical identification of bacterial isolates.
- Identified potential foodborne pathogens and assessed the public health implications of contaminated fresh produce.
- Recommended improved food hygiene, proper handling, and effective washing practices to reduce the risk of bacterial contamination.

PROFILE

A motivated and detail-oriented Microbiologist with academic training in microbiology and practical laboratory experience in specimen processing, microbiological testing, and laboratory quality procedures. Skilled in aseptic techniques, microbial analysis, laboratory documentation, and safety compliance. Possesses excellent analytical, communication, and teamwork skills, with a commitment to accuracy, continuous learning, and contributing to quality healthcare and scientific research.

EXPERIENCE

Laboratory Technician

DAAVI Laboratory | 2024 – 2025

- Conducted routine laboratory tests and microbiological analyses in accordance with standard operating procedures.
- Collected, processed, and prepared specimens for laboratory examination.
- Prepared culture media, sterilized laboratory equipment, and maintained a clean and safe laboratory environment.
- Recorded and documented laboratory findings accurately while ensuring compliance with quality control standards.

Sales Representative

GM Pharmacy | 2020 – 2022

- Promoted and sold pharmaceutical products while providing excellent customer service.
- Assisted customers with product information and usage guidance.
- Managed stock levels and maintained accurate inventory records.
- Achieved sales targets through effective communication and relationship building.
- Worked collaboratively with colleagues to ensure efficient pharmacy operations.

EDUCATION

Higher National Diploma (HND)

Microbiology

Federal Polytechnic, Auchi

2023 – 2024
