

Noble Chinonso David

CYBERSECURITY ANALYST & BLUE TEAMING SPECIALIST

Email: davenoble471@gmail.com **Phone:** 09153082253
WhatsApp: 08168682141 **Location:** Aba, Abia State, Nigeria

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Analyst and Blue Teaming Specialist with **3 to 5 years of cumulative experience** in threat analysis, network defense, vulnerability assessments, and incident detection. Highly proficient in packet analysis, deep network traffic inspection using **Wireshark**, connectivity troubleshooting, and secure Linux operating system administration (Parrot OS & Ubuntu). Backed by industry-recognized certifications including Cisco Ethical Hacker, Cisco Introduction to Cybersecurity, APIsec PCI Compliance, and iGHub Cybersecurity training. Eager to safeguard enterprise digital assets and reinforce security operations in a dynamic SOC environment.

CORE COMPETENCIES & TECHNICAL SKILLS

Blue Teaming & Defense:	Traffic Analysis, Packet Inspection (Wireshark), Log Analysis, Threat Monitoring, Security Auditing.
Offensive Security & Testing:	Ethical Hacking, Vulnerability Assessments, Network Penetration Testing, Reconnaissance, Enumeration.
Systems & Networking:	Linux Administration (Parrot OS, Ubuntu), Connectivity & Routing Diagnostics, TCP/IP, VirtualBox Lab Environments.
Compliance & Tools:	PCI-DSS Data Protection Standards, Nmap, Burp Suite, Scapy, Python Scripting, Incident Awareness.

PROFESSIONAL EXPERIENCE & CYBERSECURITY PROJECTS

Junior Cybersecurity Analyst & Blue Team Specialist

Independent Security Practice & Lab Environments | 2023 – Present (3+ Years Experience)

- Executed deep packet inspection, traffic filtering, and protocol analysis using **Wireshark** to isolate anomalous network behavior, malicious payloads, and unauthorized access attempts across virtualized network topologies.
- Conducted rigorous connectivity testing, packet tracing, and network troubleshooting to diagnose routing bottlenecks and identify security misconfigurations.
- Analyzed captured PCAP files and simulated intrusion logs to trace threat vectors and evaluate enterprise perimeter defenses.

IT Support & Network Security Specialist

Technical Operations & Systems Administration | 2021 – 2023

- Administered secure **Linux operating systems** (Parrot OS and Ubuntu) for threat hunting, penetration testing, and workstation hardening.
- Provided foundational IT support, hardware/software troubleshooting, and network connectivity diagnostics to maintain high system availability and data integrity.
- Automated security workflows and log evaluation routines utilizing Python scripts and Linux command-line utilities.

CERTIFICATIONS & PROFESSIONAL TRAINING

Cisco Networking Academy – Ethical Hacker Certification

Completed & Exam Passed (June 2026)

- Mastered ethical hacking methodologies, reconnaissance techniques, vulnerability exploitation concepts, and defensive perimeter hardening.

iGHub Innovation Center – Cybersecurity Professional Training

Aba, Abia State, Nigeria (Nov 2024 – June 2025)

- Completed intensive hands-on curriculum covering network security, threat analysis, risk management, and vulnerability assessments.

- Conducted simulated penetration testing and advanced packet capture analysis using Wireshark and Parrot OS within virtualized labs.

Additional Industry Certifications

- **Cisco Introduction to Cybersecurity:** Practical proficiency in network traffic analysis and defense using Nmap, Wireshark, and Burp Suite.
- **APIsec – API Security for PCI Compliance:** Comprehensive knowledge of PCI-DSS policies and secure payment card data protection standards.
- **Mastercard Cybersecurity Job Simulation (Forage):** Specialized focus on phishing attack mechanics, email threat identification, and mitigation.

EDUCATION

iGHub Innovation Center

Diploma / Certificate in Cybersecurity & Information Technology | 2024 – 2025
