ELECTRICAL MAINTENANCE TECHNICIAN | ELECTRICAL TECHNICIAN | INDUSTRIAL ELECTRICAL SYSTEMS | SOLAR TECHNICIAN

Ogun state,Nigeria | +234 701 327 7418 | lekefemi68@gmail.com

Professional summary

Electrical Engineering Technician with practical experience in electrical installation, preventive maintenance, corrective maintenance, troubleshooting, fault diagnosis, electrical testing, commissioning and safety compliance across residential, commercial, renewable-energy and manufacturing environments.

Experienced in electrical wiring, distribution boards, control panels, circuit breakers, electrical equipment, solar PV systems, inverters, battery systems and associated electrical components. Skilled in identifying electrical faults, carrying out repairs and maintenance activities, and supporting reliable operation of electrical systems.

Currently working in a FMCG ,gaining hands-on exposure to production processes, equipment inspection, defect identification, documentation and workplace compliance. Strong understanding of safe working practices, preventive maintenance and minimizing equipment downtime.

Holder of HND and ND in Electrical/Electronics Engineering, with practical field experience and a strong interest in electrical maintenance, plant maintenance and industrial electrical systems.

Willing to relocate: Anywhere

Work experience

ELECTRICAL TECHNICIAN

Primera Food Nigeria Limited

July 2026 to Present

- Carry out routine inspection and maintenance activities on electrical panels within the manufacturing environment.
- Perform and support electrical wiring ,connections and repairs on electrical systems and equipment.
- Assist with troubleshooting electrical faults in panels and associated electrical equipment.
- Support inspection and maintenance of generators to ensure reliable power supply to production operations.
- Monitor electrical panels and generator operation and report abnormalities requiring corrective action.
- Assist with electrical testing, fault identification and corrective maintenance activities.
- Inspect electrical wiring, connections, components and equipment for signs of faults, damage or abnormal operation.
- Support preventive maintenance activities to improve equipment reliability and minimize production downtime.
-

Electrical Technician & Solar PV Installer

Lakeblaze global ventures | Ogun state

August 2023 to March 2026

- Installed and commissioned residential and commercial solar PV systems.
- Installed PV modules, inverters, inverter chargers, battery banks, and associated control equipment.
- Performed preventive maintenance and troubleshooting of electrical and solar energy systems.
- Diagnosed and resolved electrical faults, reducing system downtime.
- Monitored solar system performance using Victron Energy and Encombi monitoring platforms.
- Conducted safety inspections and ensured compliance with electrical standards and regulations.
- Collaborated with project teams to complete installations within project timelines.

Internship

Damats computer college IT center

February 2022 to July 2022

- Provided first-line technical support for hardware, software, and network-related issues.
- Installed, configured, and updated operating systems and software applications.
- Assisted users with troubleshooting and resolving technical problems.
- Performed routine maintenance on computer systems and peripheral devices.
- Supported network configuration and connectivity troubleshooting.
- Assisted in training users on basic computer operations and software applications.

Electrical Technician/ Solar PV Installer

Onyxworldng | Lagos

November 2017 to October 2018

- Installed, maintained, and repaired electrical wiring, equipment, and control systems.
- Performed electrical troubleshooting and fault diagnosis on residential and commercial electrical systems.
- Installed switches, distribution boards, control panels, circuit breakers, and electrical accessories.
- Conducted preventive maintenance and inspections to ensure system reliability and safety.
- Installed solar panels, mounting structures, charge controllers, inverters, and battery storage systems.
- Performed DC and AC wiring for solar energy systems in accordance with electrical standards.
- Tested and monitored solar system performance to ensure optimal energy generation.

Education

IT Support Essential (Cisco Certified support Technician)

Cisco Networking Academy

Electrical/electronics engineering (Higher national diploma)

Ogun state institution of technology igbesa | Ogun state

November 2018 to January 2021

•

Electrical/electronics engineering (National diploma)

Ogun state institution of technology igbesa | Ado Odo

September 2015 to September 2017

Skills

Electrical Maintenance

Technical Support

Electrical Installation

Technical Troubleshooting

Fault Diagnosis

System Installation

Network configuration

Solar PV Installation

Preventive Maintenance

Inverter & Batteries installation

Renewable Energy Systems

Soft skills:Team work and communication

Computer software and hardware

Adaptability

Wiring and Troubleshooting

Electrical Safety Compliance

Basic Computer Skills(Ms word,ms-excel,ms-PowerPoint)

Electrical Testing

Languages

Yoruba - Native

English

Certifications and licenses

IT essentials in Cisco Networking Academy

Certificate of national service

Higher national diploma in electrical/electronic engineering

National diploma in Electrical/electronic engineering
