PERSONAL SUMMARY

IT Engineer with strong expertise in system administration, network configuration, and IT infrastructure support. Skilled in Huawei LAN/WAN deployment, network security, and performance optimization. Certified in multiple Huawei HCIA domains, with proven ability to strengthen system reliability and security. Known for effective problem-solving, technical precision, and collaborative teamwork in maintaining enterprise IT operations

SKILLS

- **Technical Skills:** Network security, network protocols (TCP/IP, DHCP), routing & switching, network devices, vulnerability scanning, system hardening, endpoint protection.
Cabling & Hardware Knowledge: Ethernet standards (Cat5e, Cat6, fiber optic), Patch panel and rack organization
- **Tools Platform:** Wireshark, Nmap, Kali Linux, Service desk platform, eNSP, Photoshop/CorelDraw.
- **Soft Skills:** Attention to detail, risk assessment thinking, incident documentation, teamwork, proactive mindset and committed to continuous learning

EDUCATION

HND. Computer Science.

Rufus Giwa Polytechnic Owo Ondo State

Nov. 2015-Mar. 2022

PROFESSIONAL EXPERIENCE

Information Security Trainer,

January 2024-present

Huawei Technologies Co. Ng. Ltd., Lagos, Nigeria: IT Dept

- Promoted a culture of security awareness and accountability across departments, encouraging proactive identification and mitigation of cyber risks.

IT Support Engineer,

Oct. 2023-Present

Huawei Technologies Co. Ng. Ltd., Lagos, Nigeria: IT Dept

- Led the installation and configuration of computer hardware, operating systems, network tools, and critical enterprise software, improving setup efficiency by 30%.
- Diagnosed and troubleshoot complex hardware failures and software faults, contributing to a 25% increase in system uptime and reducing reliance on external vendors, saving the company operational costs.

Technical Trainee – Cybersecurity: Digital Innovators Fellowship,

June 2025 – Aug., 2025

- Ran phishing tests with Zphisher to show social engineering risks, and suggested fixes like staff training and better email filters.
- Tested password security with John the Ripper, cracked weak MD5 passwords, and advised using stronger hashing (SHA-256, MD5) and stronger password rules.
- Did digital forensics labs with Autopsy and FTK Imager to recover deleted files, check metadata, and practice proper evidence handling.

Technical Trainee – Cybersecurity: 3MTT Fellowship — NITDA / FGN,

Nov 2023 – May 2024

- Completed a rigorous 6-months, hands-on cybersecurity fellowship focused on technical specialization, project delivery, and workplace readiness.

- Participated in real world cybersecurity simulations including network defense, vulnerability assessment, and incident response.

National Youth Service Corp.,

Nov.2022- Oct.2023

Huawei Technologies Co. Ng. Ltd. Lagos, Nigeria: IT Dept

- Configured Huawei Idea Hub, laptops, operating systems, drivers, and essential applications to optimize system performance and ensure seamless user experience across departments.
- Led the successful configuration of Holowits CCTV systems, enhancing site-wide surveillance capabilities and improving security monitoring efficiency.

Intern: Federal University of Technology Akure Ondo, Nigeria.

Jan.,2018-Dec., 2018

- Developed desktop applications using VB.NET, leveraging object-oriented programming to create user-friendly interfaces and efficient workflows. Additionally, utilized Microsoft Office Suite to produce professional documents and performed software installations and configurations to ensure system compatibility and performance.

PROJECTS

IT Support Engineer: Huawei LAN Revamping

Huawei Technologies Co. Ng. Ltd. (Lagos, Nigeria): VI12 Chinese Dormitory 2024

- Participated in the revamping of a legacy LAN infrastructure into a high-performance, secure, and scalable Huawei-based network for an enterprise environment.

Final Year Project: Design Of Campus Network with Advanced Security and Fault-Tolerance Configuration

- Designed and simulated a secure and scalable campus network using Huawei's eNSP platform. The project incorporated advanced configurations for enterprise-grade wireless access, network segmentation, and centralized management using Huawei's Access Controller (AC) and Layer 3 switches

VOLUNTEER EXPERIENCE

Rufus Giwa Polytechnic Owo, Ondo State.
