

OLALEYE DANIEL

AI Data Annotation & Evaluation

+234 704 824 5157 | danielolaleye080@gmail.com | github.com/ephitah | Igando, Lagos, Nigeria

PROFESSIONAL SUMMARY

Computer Science graduate (2:1) with hands-on experience in AI data evaluation across text, voice, and visual modalities, transitioning from a software development background into a focused annotation and evaluation track. Experience includes response comparison and preference/quality judging, voice-based evaluation (steerability, free-association, multilingual code-switching), and image/video evaluation — judging AI-generated visual content against user prompts — completed through freelance platform work on Outlier AI. Technical background in Python and web development supports fast onboarding to platform tooling, structured task guidelines, and API-driven workflows. Comfortable following defined evaluation criteria consistently and documenting judgment rationale clearly.

CORE COMPETENCIES

Evaluation: Response comparison (A/B) · Preference/quality judging · Voice steerability assessment · Free-association evaluation · Multilingual code-switching evaluation · Image/video prompt-adherence judging

Analytical: Guideline interpretation · Consistency checking · Structured decision-making under defined criteria · Data analysis (Python/Pandas, SQL)

Technical: Python · FastAPI · Git/GitHub · Linux CLI (SSH, netcat, nmap, openssl) · React · JavaScript · REST APIs

Communication: Cross-platform task documentation · Translating technical concepts for non-technical audiences · Clear written judgment rationale

AI DATA ANNOTATION & EVALUATION EXPERIENCE

Freelance Evaluator — Outlier AI *Jun 2026 – Present (intermittent)*

- Evaluated model responses through A/B comparison, judging preference and quality against defined criteria on the Aether project.
- Judged AI-generated images and videos for adherence to the user's original prompt.
- Conducted voice-based evaluation tasks assessing steerability and free-association responses.
- Assessed multilingual code-switching quality in voice evaluation tasks.

ADDITIONAL EXPERIENCE

Coding Instructor (NYSC Corps Member) — Wizzyhub Technologies *Apr 2026 – Present*

- Teach programming fundamentals to children, translating technical concepts into clear, accessible lessons — direct experience communicating structured reasoning to varied audiences.

Frontend Developer Intern — DevCrypt (OOU Website Project) *Mar 2025 – May 2025*

- Built a live API data pipeline to ingest and display real-time content, following data-accuracy and delivery requirements precisely.
- Managed codebase changes using Git and GitHub, maintaining a clean, traceable, guideline-consistent history.

SIWES Intern — Neuro Psychiatric Hospital ICT *May 2024 – Oct 2024*

- Designed web-based data entry forms and debugged display issues, ensuring accuracy and consistent rendering of structured clinical information.

EDUCATION & CERTIFICATIONS

B.Sc. Computer Science — Olabisi Onabanjo University

Second Class Upper Division (2:1) | Oct 2021 – Jul 2025

- Claude 101 & AI Fluency — Anthropic Academy (2025)
- Prompt Engineering for AI Workflows — Self-directed (2025)
- OverTheWire Bandit — Linux & Security Fundamentals Wargame (In Progress, 2026)

TECHNICAL SKILLS & LANGUAGES

Tools: Python, FastAPI, React, JavaScript (ES6+), REST APIs, JSON, Pandas, SQL (SQLite), Git/GitHub, Linux CLI, Tailwind CSS

Languages: English (Proficient), Yoruba (Native)
