WORK EXPERIENCE

Data Analyst

Jammal & OA Fashion Service, 2023 - Present

- As a data analyst , I was able to conduct statistical tests and experiments to validate hypotheses and make data-driven decisions.
- I apply statistical and analytical techniques to interpret data, identify trends, patterns, and relationships.
- I monitor key performance indicators (KPIs) and metrics to assess the effectiveness of strategies and initiatives.
- I ensure effective collaboration with cross-functional teams such as business analysts, data engineers, and decision-makers to solve complex problems.
- Creating reports and presentations summarizing findings, insights, and recommendations for stakeholders.

Network Operations Center (NOC) Engineer

IHS Towers, 2024

- Monitored network performance, availability, and alarms using NOC tools to ensure 24/7 uptime and service reliability.
- Responded to network faults, escalated critical incidents and coordinated with field engineers for timely resolution.
- Performed root cause analysis (RCA) to prevent recurring issues and improve network stability.
- Supported network upgrades configuration changes and routine maintenance with minimal downtime.
- Documented incidents, prepared daily/weekly reports, and provided recommendations to improve operational efficiency.
- Ensured compliance with company SLAs and collaborated with cross-functional teams to optimize service delivery.

SKILLS

Data collection, data cleaning, pivot tables, data analysis, google spreadsheets, visualizations using tableau, SQL, network monitoring and troubleshooting (using NOC tools), root cause analysis, system and network performance monitoring, documentation and reporting, collaboration under pressure, problem solving and critical thinking
