PROFESSIONAL SUMMARY

Graduate Electrical Engineer with a B.Eng. in Electrical Engineering and hands-on experience in maintenance planning, industrial electrical systems, technical support, and network infrastructure. Completed NYSC with practical exposure to preventive maintenance, equipment troubleshooting, CCTV systems, network configuration, and technical support within a manufacturing environment. Passionate about equipment reliability, continuous improvement, safety, and operational excellence. Seeking to build a career in Maintenance Engineering within a world-class manufacturing organization.

EDUCATION

Nigeria Maritime University, Delta State
Bachelor of Engineering (B.Eng.) Electrical Engineering
Second Class Honours (Lower Division) – 2024

TECHNICAL SKILLS

- Preventive & Corrective Maintenance
- Electrical Equipment Troubleshooting
- Industrial Safety Practices
- Maintenance Planning
- Electrical Control Systems
- PLC Fundamentals
- Industrial Networking
- CCTV & IP Camera Systems
- Network Switch Configuration
- Microsoft Excel
- Microsoft Office Suite
- Technical Documentation

PROFESSIONAL EXPERIENCE

IT Support - NYSC Intern

September 2025 - August 2026

African Steel industries

- Supported the maintenance and configuration of industrial network infrastructure.
- Installed and configured IP CCTV surveillance systems across production facilities.
- Configured network switches and assisted in equipment connectivity.
- Diagnosed and resolved hardware, printer, software, and network faults, minimizing operational downtime.
- Provided technical support to production and administrative staff.
- Assisted in preventive maintenance of IT and surveillance equipment.

Maintenance Planner

February 2024 - October 2024

Big Bottling Company

- Developed preventive maintenance schedules to improve equipment availability and reliability.
- Prepared work orders and maintenance work packs for electrical and mechanical maintenance activities.
- Assisted with maintenance planning, shutdown coordination, and resource allocation.
- Estimated maintenance costs, labour requirements, and project timelines.
- Collaborated with production and maintenance teams to reduce equipment downtime.
- Maintained maintenance records and supported continuous improvement initiatives.

Industrial Attachment

October 2022 - February 2023

Lotus Plastics — Maintenance Department

- Developed preventive maintenance schedules to improve equipment availability and reliability.
- Prepared work orders and maintenance work packs for electrical and mechanical maintenance activities.
- Assisted with maintenance planning, shutdown coordination, and resource allocation.
- Estimated maintenance costs, labour requirements, and project timelines.
- Collaborated with production and maintenance teams to reduce equipment downtime.
- Maintained maintenance records and supported continuous improvement initiatives.

CORE COMPETENCIES

- Communication
- Teamwork
- Adaptability & Fast Learning
- Analytical Thinking
- Attention to Detail
- Problem Solving
- Time Management
