PROFILE SUMMARY

Multidisciplinary Healthcare Experience with dual/triple background in clinical nursing, pharmaceutical care, and Health Information Management (HIM). Adept at bridging direct patient care, medication safety, and Electronic Health Records (EHR) accuracy. Proven track record in improving clinical outcomes, reducing medication errors, and ensuring data compliance.

HIGHLIGHTS

- **Clinical Care & Assessment:** Patient assessment, vital sign monitoring, wound care management, and emergency response.
- **Medication & Safety:** Safe medication administration, infection control protocols, and adherence to patient safety guidelines.
- **Technology & Communication:** Electronic Health Records (EHR) navigation, telehealth delivery, and compassionate bedside manner.
- **Medication Management:** Prescription dispensing, clinical pharmacology review, dosage evaluation, and compounding/formulation.
- **Patient Counseling:** Health education, safety advisement, and screening for adverse drug interactions or allergic reactions.
- **Data Integrity & Compliance:** Patient data confidentiality, zero-error record audits, and compliance with national standards.
- **Health Systems & Analytics:** Proficiency in Health Management Information Systems, statistical reporting, and morbidity/mortality tracking.
