Professional summary

Mechanical Engineer with strong foundation in machine design and specializing in manufacturing and production operations. Experienced in tooling, jig & fixture design, and lean manufacturing principles. Adept at troubleshooting machinery, and implementing quality control systems to meet production targets while maintaining safety and cost standards. Eager to apply analytical problem-solving and hands-on project experience to optimize production efficiency, ensure equipment reliability, and support engineering projects in a manufacturing environment.

Work experience

Mechanical Engineering

Avon Crowncaps & Containers | Sango otta

May 2023 to December 2023

1. Delivered machine repair and installation support for manufacturing while maintaining compliance with safety standards.
2. Coordinate inspection and lubrication activities to reduce production delays.
3. Owned reporting and supported issues resolution between mechanical engineering and other engineering.

Mechanical engineering intern

Avon Crowncaps & Containers | Sango otta

June 2022 to May 2023

1. Assisted in optimizing mechanical systems for manufacturing processes, improving production speed
2. Drafted and implemented quality control procedures, reducing defects and inconsistencies.
3. Supported the creation of detailed project reports and documentation.

Education

Mechanical Engineering (Higher National Diploma)

Federal polytechnic ilaro | Ilaro

October 2023 to October 2025

Mechanical Engineering (Original National Diploma)

Moshood Abiola Polytechnic | Abeokuta

November 2019 to December 2021

Skills

Problem solving

Communication skills

Target driven
