PROFESSIONAL SUMMARY

Cybersecurity professional with practical experience in security operations, threat investigation, vulnerability assessment and threat intelligence. Trained through recognised cybersecurity programmes and experienced in conducting practical security projects and investigations.

Strong interest in cybersecurity education, with experience in technical writing, research and simplifying complex technical concepts for general audiences. Able to communicate cybersecurity topics clearly and support learners in developing foundational knowledge and practical understanding of cybersecurity.

CORE SKILLS

- Cybersecurity fundamentals
- Network security and networking basics
- Security awareness and phishing prevention
- Security monitoring and log analysis
- Threat intelligence and OSINT
- Vulnerability assessment
- Technical writing and documentation
- Research and communication

PROFESSIONAL EXPERIENCE

Security Analyst Training | CyBlack SOC Academy
2026

- Completed structured training in security operations and threat investigation.
- Participated in practical exercises involving log analysis, security monitoring and incident investigation.
- Worked with Splunk, Wazuh, Nessus and threat intelligence tools.

Cybersecurity Intern | Ubuntu Bridge Initiative (UBI)

2026

- Completed seven assessed cybersecurity projects covering cryptography, web security, incident response, governance and security operations.
- Built and worked with a network detection and analysis environment using Python, DuckDB, Zeek, Suricata and Wazuh.
- Practised security monitoring, log analysis, threat detection and incident investigation.

Cybersecurity Trainee | Centre for Cyber Security Studies & Research

2024

- Received foundational cybersecurity training.
- Developed knowledge of cybersecurity principles, network security and common cyber threats.

PROJECTS

Threat Intelligence Investigation

- Researched the Sea Turtle threat actor using OSINT and MISP.
- Analysed indicators of compromise and documented findings.

Security Monitoring and Log Analysis

- Analysed Windows security events and Linux SSH authentication logs.
- Investigated suspicious activity and documented findings using practical lab environments.

Vulnerability Assessment

- Used Nessus to identify vulnerabilities in a test environment.
- Documented findings and explored remediation using Ansible.

Phishing and Business Email Compromise Investigation

- Analysed a simulated business email compromise case.
- Reviewed evidence and documented investigation findings.

WRITING EXPERIENCE

Volunteer Writer | YPIT
2026

- Write educational articles on technology and digital topics.
- Break down technical concepts into simple language for general audiences.
- Conduct research and organise information into clear, readable content.
- Collaborate with other writers and incorporate editorial feedback.

EDUCATION

Ordinary National Diploma (OND), Civil Engineering
Yaba College of Technology | 2019

CERTIFICATIONS

- Cisco CyberOps Associate
- Google Cybersecurity Certificate
- Certified Social Engineering Defense Practitioner (CSEDP) – SecOps Group
- Certified Cybersecurity Education Professional (CCEP)
