EXPERIENCE

Mathematics & Data Processing Teacher | 2021 - Present

D'Royal Model Secondary School, Ogun State

- Redesigned the maths curriculum, developed assessments, and introduced targeted intervention sessions, increasing proficiency scores by 16% and WAEC predictions by 30% within three months.
- Conducted question and topic-level analysis to identify specific areas of weakness, informing improvements to teaching and learning across the wider school.
- Built an Excel-based tracking system to monitor student weekly performance, enabling timely evidence-based reporting to school leadership.
- Managed relationships with parents, school administrators, and colleagues across departments, presenting performance data and intervention plans to support school-wide student retention and enrolment goals.
- Improved communication and collaboration skills across the school by embedding structured group work, presentations, and active discussion into lessons.

Data Analysis Intern | May 2024 - Aug 2024

NIIT, Ota, Ogun State

- Analysed customer transaction data to identify sales trends, cleaned and structured 10,000+ records using Excel and SQL, and delivered weekly visual reports for stakeholders.
- Reduced reporting turnaround time by 40% through a structured data pipeline.
