

ENOCH ADEYEMI

✉ enochadeyemioluwapelumi@gmail.com ☎ 09038058786 📍 Jos, Plateau State, Nigeria

Summary

Results-oriented Mechanical Engineering graduate and Operations Manager with a proven ability to lead teams and manage facility operations. Combines technical engineering expertise with administrative acumen, currently managing daily operations for a large-scale agricultural facility. Experienced in personnel supervision, resource allocation, and project coordination.

Experience

Assistant Operations Manager / Gilgal Integrated Concept Ltd.

Jos, Plateau State / November 2024 – Present

- Lead the daily operations of a semi-mechanized poultry facility with a 8,000-bird capacity, ensuring optimal productivity and biological safety.
- Supervise, train, and manage a team of staff members, delegating tasks and monitoring performance to ensure adherence to operational schedules.
- Oversee inventory management, feed allocation, and facility maintenance, utilizing organizational skills to minimize waste and maximize yield.
- Implement administrative protocols for record-keeping and reporting, streamlining the workflow between the farm floor and management.

Maintenance and Repair Engineering Intern / Cadbury Nigeria Plc

Ikeja, Lagos / February 2023 – September 2023

- Supported the major overhaul of a 4.5 MW power generator, assisting in component disassembly, inspection, and performance testing to restore peak operational efficiency.
- Executed the safe decommissioning of industrial boiler systems, ensuring strict adherence to environmental regulations and hazardous material protocols.
- Participated in the commissioning of a multi-unit air filtration station, verifying system integrity, airflow specifications, and operational readiness.
- Conducted maintenance on power grid infrastructure, assisting senior engineers in troubleshooting distribution lines to ensure grid stability.
- Ensured workplace safety compliance by preparing and reviewing Safety Permits (PTW) and conducting risk assessments before the commencement of repair tasks.

Fabrication Engineering Intern / FrieslandCampina WAMCO

Ikeja, Lagos / July 2022 – August 2022

- Fabricated precision components using manual machining tools including lathes, drill presses, and surface grinders, ensuring strict adherence to dimensional tolerances.
- Processed specialized materials such as Polytetrafluoroethylene (PTFE/Teflon) to produce high-performance bushings, seals, and mechanical parts.
- Performed maintenance and repair tasks, including re-threading damaged screws and fabricating replacement parts to minimize equipment downtime.
- Maintained a clean and safe work environment, strictly following Standard Operating Procedures (SOPs) for machine safety and workshop organization.

Education

Bachelor of Science (B.S.) in Mechanical Engineering / Covenant University

Ota, Ogun State / August 2024

Certificates

SOLIDWORKS Design Associate (CSWA)

SOLIDWORKS Additive Manufacturing Associate

SOLIDWORKS Sustainability Associate

SOLIDWORKS Electrical Design Associate

Microsoft Excel - Excel from Beginner to Advanced (Udemy)

Skills

Operations Management, Team Supervision, Resource Allocation, Project Coordination, Administrative Support

Machinery Maintenance, Fabrication (Lathe/Drill/Grinding), HSE Protocols, Permit to Work (PTW) Systems

AutoCAD, Data Analysis (Excel/Python), Computer Programming, Graphic Design

Technical Problem Solving, Cross-functional Collaboration, Adaptability, Communication
