

CHARLES UWEGHREPHA

Port Harcourt, Rivers State Nigeria

Email: Cuweghrepha@gmail.com

Phone: (+234) 813 862 3046

PROFESSIONAL SUMMARY:

Results-driven and Safety-focused Project Engineer with offshore experience in pipeline installation, welding operations, and subsea support, complemented by 3+ years as a Certified Surface Well Testing Operator. Proven ability to supervise deck operations, ensure HSE compliance, and maintain pipeline integrity through effective coordination with fabrication teams. Strong background in flowback operations, production testing, EPF systems, and field measurements (BS&W, API, gas S.G.), consistently delivering safe, efficient, and high-quality results in demanding environments.

SKILLS/EXPERTISE:

- Microsoft Office Suite (Word, Excel & PowerPoint)
- Engineering & QA/QC Documentation
- HSE Compliance & Risk Assessment
- Pre-Commissioning (Pigging & Hydro Test)
- Technical Reporting & Documentation
- Team Coordination & Site Supervision
- Engineering Drawing Interpretation
- Well Testing & Production Operations

WORK EXPERIENCE

Well Fluid Services Ltd, PH, Rivers State

Field: Atala bayelsa, Ajapa delta

Well Test Operator (September, 2024 - 2026)

- Participated in all field operations, rig up and rig down, housekeeping etc.
- Monitored and controlled well test equipment during operations to ascertain the operating pressures and flow rate
- Recorded critical well parameters, including flow rate, bottom-hole and surface pressures, temperatures, gas-oil ratios (GOR), and fluid densities.
- Responded to emergencies and operational issues during well testing activities.
- Maintained and troubleshooted well test equipment and instrumentation.
- Draw down test
- Build up test
- Multi rate test
- Identified and resolved mechanical and operational issues on the spread such as valve malfunctions and level control failures during active testing.

Well Fluid Services Ltd, PH, Rivers State**Field: Multisub Olure Well 1**

Well Test Operator (September, 2023 - August, 2024)

- Participated in all field operations, rig up and rig down, housekeeping etc.
- Collected accurate oil, gas and water samples at designated intervals for laboratory PVT and compositional analysis.
- Conducted safety meetings (toolbox talks), perform routine inspections of safety devices like PSVs and ESD systems
- Maintained and troubleshooted well test equipment and instrumentation.
- Monitored and controlled well testing equipment during operations.
- Ensured compliance with environmental regulations and company policies during testing.
- Implemented safety protocols to prevent blowouts, spills, and equipment failures.

Raycon Construction Company, Warri, Delta State

Heavy Duty Machine Engineer/Logistics Officer (March, 2021 - April, 2023)

- Inspected, maintained, and repaired heavy machinery and equipment.
- Diagnosed mechanical, hydraulic, and electrical faults in machines.
- Developed and implemented preventive maintenance schedules.
- Supervised and trained maintenance technicians and workshop staff.
- Prepared technical reports, maintenance logs, and procurement records.

EDUCATION:**CERTIFICATION**

- **Certified Surface Well Testing Operator (2026)**
- **National Youth Service Corp (NYSC).**
National Service (2019-2020)
- **Delta State Polytechnic Otefe, Oghara.**
Higher National Diploma (HND) in Mechanical Engineering (2016-2018)
- **Delta State Polytechnic Otefe, Oghara.**
National Diploma (ND) in Mechanical Engineering (2012-2014)
- **KWS Web Services Training (2026)**
SWT- Surface Sand Control
SWT- Test Separator
Choke Manifold

Gauge Tanks and Surge Tanks
SWT- The Well Test DATA

- **Well Fluid Service Limited (2024)**
Basic Surfaces Well Testing

REFEREES:

Available On Request.
